

Stop and Think! How would you bounce back?

If you faced the ultimate test of your Business Continuity Capability, how quickly and completely would you bounce back?

"We want organisations to stop and think about the way they plan and conduct business, how they would recover after an adverse event, and ways to improve their resilience in the face of extreme effects" - Dr John Vargo, Canterbury University.

Business Continuity Awareness Week 2010 *"Resilience over Uncertainty"*

As part of Business Continuity Awareness Week (BCAW), Linus has invited guest presenters from two different organisations to share their experiences around the theme of "Resilience over Uncertainty". We invite you to participate in this important event.

Learn how **Land Victoria** dealt with operational disruption twice in 18 months and hear how Australia's largest private health insurer **Medibank Private** approached their capability to respond and recover. Also find out "Which Piece of the Resilience Puzzle Are You?" – presented by Saul Midler MBCI.
